IDENTIFIERS	*California

ABSTRACT

In an effort to provide laymen with a comprehensive overview of the state's postsecondary educational community, data about both the public and private sectors are presented in pictorial and tabular form. Four categories of information are included: enrollment, degrees conferred, faculty, and finance. Data on the public institutions are included for all four areas; for independent colleges and universities, only enrollment and degrees are presented. In most cases, data are given for 1971-72 through 1975-76. (MSE)

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

STATE OF CALIFORNIA EDMUND G. BROWN JR., *Governor*

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION
1020 TWELFTH STREET
SACRAMENTO, CALIFORNIA 95814
(916) 445-7933

I take great pleasure in transmitting this first edition of the California Postsecondary Education Commission's Information Digest.

The constructive use of information in the formulation and review of postsecondary educational policy is the Commission's single most important responsibility. The call for the development of timely, accurate, and comparable information appears repeatedly throughout the Commission's chartering legislation and has been reaffirmed on numerous occasions by the Legislature since the Commission's inception. Publication of the Digest represents the Commission's first attempt to provide a comprehensive overview of California's postsecondary educational community.

The charts, graphs, and tables contained in this document have been designed for the layperson. Where possible, information has been displayed in pictorial form to facilitate reader understanding.

The 1977 Information Digest contains four types of information; student enrollment, degrees conferred, faculty, and finance. Data has been drawn from a variety of sources to construct the charts and graphs that appear in each section. Unfortunately, some information appearing in the Digest cannot be used to make comparisons between and within segments due either to inconsistent data definitions or insufficient institutional responses. A portion of the text preceding each section of the Digest, entitled "Caveats - Please Note", has been reserved to document these inconsistencies. The reader is urged to give particular attention to these caveats, and to cite them, when excerpting information from the Digest.

One area which should receive particular attention is ethnicity. Information describing the ethnic composition of California's faculty was intentionally left out of this year's Digest because our staff was unable to obtain comparable sources of data between the segments. Student ethnicity information has been included, but use of this data should be considered carefully prior to employing it in legislative, Executive, segmental, or institutional planning. Student ethnicity data was obtained using voluntary student self-designation, and may exhibit statistically significant abnormalities due to high nonresponse rates. The potential for unintentional misuse of student ethnicity information is great, and I urge that it be used with great caution.

The information appearing in the Digest represents only a small portion of the data that has been used to construct its graphs and charts. Additional, and more detailed, information on student enrollment, degrees conferred, and faculty, is available from the Commission upon written request.

In preparing the *Digest* for publication, our staff worked closely with the agencies supplying information to ensure its accuracy. The segments have been provided opportunities to review the material appearing in the *Digest* and to check their data for accuracy prior to publication. The Commission has also expended large quantities of both human and computer time auditing and cross checking data prior to publication. Even though we have employed exhaustive audit procedures, we are aware of a few errors that eluded our attention. These errors are noted on the enclosed *errata* page.

I wish to extend my appreciation to the University of California, the California State University and Colleges, the California Community Colleges, and our colleagues in the independent institutions for their aid in preparing and auditing the data used in the *Digest*. I wish also to acknowledge the aid of the State Level Information Base Task Force (a project supported by the Kellogg Foundation) of the National Center for Higher Education Management Systems, for the ideas it has contributed during the course of our work. Finally, I commend Mr. Murray Haberman of the Commission staff, for his patience and determination in bringing this complicated project to fruition.

I welcome reader comments regarding the format, content, and, in particular, the usefulness of the *Digest*. Your constructive comments will form the basis for changes in future editions and lead to improved ways in which we can understand the complexities of California's postsecondary educational system.

For the Commission,

Don McNeil

Donald R. McNeil
Director

ERRATA

California's Public Colleges and Universities

Enrollment Section

- In the display entitled "Opening Fall Enrollment 1972-1976" change the opening Fall 1972 figure from 924,432 to 724,432 for the California Community Colleges.

- In the display entitled "Annual Enrollment in Extension and Ungraded Classes", the headings may be misleading. The California Community Colleges' data reflects Fall term enrollment only, whereas the California State University and Colleges and the University of California data are annual enrollment figures.

- In the display entitled "Opening Fall Enrollment, By Age, By Level of Student, By Segment, 1972-1976 – University of California – the Fall 1976 figures for students age 35 and over, should read 142 instead of 517 at the lower division level, 1,269 instead of 1,647 at the upper division level, and 3,010 instead of 9,650 at the graduate level.

Degrees Section

- In the display entitled "Degrees Conferred by Sex, 1971-72 to 1975-76 – California State University and Colleges – Masters", the footnote at the bottom of the page should read "*Includes 7 Joint Doctorates in 1972-72, 1972-73, and *1975-76*; and 6 Joint Doctorates in 1973-74 and 1974-75."

Faculty Section

- In the display entitled "University of California, Full-Time Faculty, Mean Salaries, and Tenure Status, By Sex, 9 Month Contract, Fall 1972", the total mean salary for males should read 17,987 instead of 17,610.

Finance Section

- The finance data represented with dollar signs in this section is correct, however, graphic techniques precluded, in some cases, illustrating the data to proper scale.

CALIFORNIA'S PUBLIC COLLEGES AND UNIVERSITIES

CALIFORNIA'S PUBLIC COLLEGES AND UNIVERSITIES

California's system of public postsecondary education is the largest in the nation and currently consists of 135 campuses serving nearly 1.5 million students. This system is separated into three distinct public segments — the University of California, the California State University and Colleges and the California Community Colleges.

To provide guidelines for the orderly development of the three major public segments, the *Master Plan for Higher Education in California 1960-75* was developed and its recommendations were largely incorporated into the Donahoe Higher Education Act of 1960. The purpose of the act was to define the function and responsibilities of each segment and to establish an economical and coordinated approach to the needs of higher education.

The University of California (UC). The UC system consists of nine campuses, including a separate medical facility at San Francisco, and a number of special research facilities located throughout the state. Medical schools are presently located at the San Francisco, Los Angeles, San Diego, Davis and Irvine campuses. Hastings College of Law in San Francisco, although affiliated with the University, operates under a separate statutory board of directors. To govern the University of California, the State Constitution grants full power of organization and governance to a 23-member Board of Regents, serving 12-year terms. The Regents have substantial freedom from legislative or executive control.

In addition to the function of instruction, which is basic to all three segments of public higher education, the University of California is designated as the primary state-supported agency for research. Instruction is provided to both undergraduate and graduate students in the liberal arts and sciences and in the professions, including teaching. The University has exclusive jurisdiction over graduate instruction in the professions of law, medicine, dentistry and veterinary medicine. It has sole authority for awarding the doctorate degree with the exception that in selected fields, joint doctoral degrees may be awarded with the California State University and Colleges.

The California State University and Colleges (CSUC). This system, comprised of 19 campuses, is governed by a statutory 23-member Board of Trustees. A student trustee serves a two-year term and the remaining 22 members serve eight-year terms. Although the Board of Trustees does not have the constitutional autonomy of the UC Regents, the Donahoe Act of 1960 did provide for centralization of policy and administrative functions which are carried out by the Chancellor's office.

The primary function of CSUC is to provide instruction to both undergraduate and graduate students in the liberal arts and sciences, in applied fields and in various professions including teaching. The granting of bachelor's and master's degrees is authorized but doctorate degrees may not be granted except under the joint doctoral program noted above in the UC statement. Faculty research is authorized only to the extent that it is consistent with the instruction function.

The California Community Colleges (CCC). A 15-member Board of Governors was created by statute in 1967 to provide leadership and direction to the 70 community college districts (with 104 campuses) that comprise the system. Unlike UC and CSUC, community colleges are administered by local boards and derive the majority of their funds from local property taxes.

Instruction in public community colleges is limited to lower division levels (freshman and sophomore) of undergraduate study in the liberal arts and sciences and in occupational or technical subjects. The granting of the associate in arts or the associate in science degree is authorized. Community services courses are also offered at no state cost.

The California Maritime Academy (CMA). As a result of Chapter 1069, Statutes of 1972, the academy is now governed by an independent seven-member Board of Governors appointed by the Governor for four-year terms. Established at Vallejo in 1929, the academy provides a program for men and women who seek to become licensed officers in the United States Merchant Marine.

E N R O L L M E N T

ENROLLMENT

INTRODUCTION

Data for displays appearing in this section were obtained primarily from segmental annual reports: *Statistical Summary of Students and Staff* of the University of California; *Statistical Abstract* of the California State University and Colleges; and analytical summaries produced by the Chancellor's Office of the California Community Colleges. Enrollment data for Fall term 1976 was obtained from computer tapes submitted by the University of California and the California State University and Colleges. Additional sources of data were the National Center for Education Statistics' annual Higher Education General Information Survey (HEGIS); the federal Office for Civil Rights Student Enrollment Survey; and special reports submitted by segmental systemwide offices and by the Population Research Unit of the Department of Finance. All data and displays appearing in this section were verified by the systemwide offices of each segment.

SIGNIFICANT TRENDS

For the first time in five years, opening Fall enrollment declined in the California State University and Colleges. Estimated 1976 enrollment figures for the California Community Colleges indicate the same occurence. Beginning with Fall 1976 data, University of California enrollment statistics will not distinguish between Extended University and regularly-enrolled students. Selected programs that have previously been reported as "Extended University" are now offered as part of the regular instructional programs of the campuses. Were Extended University students excluded, the regularly-enrolled student population would show a decrease from Fall 1975.

The percent of part-time students attending the California Community Colleges increased over the five-year period reported. In Fall 1976, nearly 70% of the students were attending part-time. The percent of undergraduate part-time students within the University of California also increased over the same period, but to a lesser extent than in the Community Colleges. The opposite trend is evident within the graduate division of the University, where part-time students decreased from 7.3% in 1972, to 5.7% in 1976. The percent of undergraduate part-time students in the California State University and Colleges remained relatively constant during the past three years, but increased moderately at the graduate level.

Females continue to account for an increasing proportion of the enrollment at both the University, and the State University and Colleges. Women outnumbered men at the graduate level in 1976 at the State University and Colleges. The ratio of men to women in the Community Colleges remained approximately the same in 1976 as in 1975, although estimated 1976 figures do indicate an increase from 44.4% in 1972 to 48.7% in 1976.

In Fall 1976, the three most heavily enrolled disciplines at the upper division level within the University were Social Sciences, Biological Sciences, and Interdisciplinary Studies. At the graduate level, Social Sciences, Biological Sciences, and Engineering enrolled the greatest number of students. Social Sciences was also among the top three disciplines at both the upper division and graduate levels at the California State University and Colleges in Fall 1976. Business and Management, and Fine and Applied Arts also drew heavy enrollments at the upper division level, while Business and Management, and Education were two of the three most heavily enrolled disciplines at the graduate level in Fall 1976.

CAVEATS — PLEASE NOTE

(a) Unless specifically indicated otherwise, all enrollment figures are for "regularly" enrolled students, and exclude extension and ungraded student enrollment. "Enrollment .... in ungraded classes" refers to the California Community Colleges only, and is reported for the Fall term. Extension enrollments pertain to the University and to the State University and Colleges and are reported on an annual basis.

(b) Beginning with the Fall term of 1973, the Community Colleges reporting methodology for ungraded (adult) classes was changed in response to legislation. For this reason, comparisons between Fall 1972 and subsequent year enrollment figures cannot be made.

(c) Student ethnicity data reflects voluntary self-designations made by students. Many students chose not to report their ethnic category in each of the years displayed in the tables. In addition, the data are incomplete for the Community Colleges and may not accurately reflect the ethnic composition of their student population. Reporting categories established by the federal government have also changed several times over the years. For these reasons, student ethnicity data is non-comparable between and within years or inter- or intra-segmentally, or between student level and sex. In 1974 the California Community Colleges prorated their "No Response and Other" students among the ethnic categories.

(d) In "Opening Fall Enrollment by Level of Student," the University of California and the California State University and Colleges differ in their definitions of student level at the lower division. The State University and Colleges defines a lower division student as one possessing less than 90 quarter units; the University's definition is fewer than 84 quarter units.

(e) The University and the State University and Colleges have used different procedures for computing student full-time equivalency.

(f) The California Community Colleges and the University of California reported student age data for less than 100% of their student populations due to student non-response.

(g) All Fall 1976 enrollment figures for the California Community Colleges are March 1977 estimates provided by the Chancellor's Office.

(h) The definitions of full-time and part-time graduate students differ between the University and the State University and Colleges.

The State University and Colleges defines a full-time graduate student as one enrolling for 12 or more units.

The University does not use credit load as a measure of graduate student "full-timeness." Full-time graduate students are those who are progressing toward their degree/certificate objective at a rate which is 75% or more of a normal full-time rate as determined on individual bases by their graduate advisers. Part-time graduate students are those who are progressing toward their degree/certificate objective at a rate which is less than 75% of a normal full-time rate as determined on individual bases by their graduate advisers.

(i) In the tables illustrating enrollment by disciplines for the California State University and Colleges, the term "Undeclared" is used to designate students who did not select a major.

(j) In the tables illustrating enrollment by disciplines for the University of California, undergraudate enrollment is not reported for Fall 1972, 1973, and 1974. In Fall 1975 and 1976 only upper division and graduate enrollments are reported by discipline.

DEGREES CONFERRED

INTRODUCTION

The University of California has exclusive jurisdiction over graduate instruction in the professions of law, medicine, dentistry and veterinary medicine. It has sole authority for awarding the doctorate degree with the exception that in selected fields, joint doctoral degrees may be awarded with the California State University and Colleges.

The California State University and Colleges is authorized to grant both bachelors and masters degrees, but doctorate degrees may only be granted under the joint doctoral degree program with the University.

The California Community Colleges are authorized to grant one and two year certificates, and two year associate level degrees.

Degrees conferred and certificates awarded data were obtained from the *Statistical Summary of Students and Staff* of the University of California; *Statistical Abstract* of the California State University and Colleges; the Higher Education General Information Survey (HEGIS) of the National Center for Education Statistics; and computer tapes supplied by the University of California and the California State University and Colleges. All data and displays appearing in this section were verified by the systemwide offices of each segment prior to publication.

SIGNIFICANT TRENDS

The University of California and the California State University and Colleges awarded 65,552 bachelors, 16,096 masters and 2,075 doctoral degrees in 1975-76. Additionally, the University awarded 530 intermediate degrees between the masters and doctorate, and 1,681 professional degrees. The number of degrees awarded has increased since 1971-72 in each degree level, other than doctorates, as follows: bachelors, 6%; masters, 18.7%; doctorates, no changes; intermediate, 5.8%; professional, 11.6%. Women received an increasing percent of degrees awarded over the five year period in every degree level. From 1971-72 to 1975-76, women moved from 41.1% of bachelors degrees awarded to 44.5%. At the masters level, from 36.1% to 42.6%; from 15.8% of doctorates to 21.6%; from 26.7% of intermediate degrees to 34.9%; and most dramatically, from 11.8% of professional degrees to 27.5%, a 160% increase over 1971-72. Although 1975-76 data for the Community Colleges were not available in time for publication, the four year trend from 1971-72 to 1974-75 indicates that women are receiving an increasing percent of the associate degrees awarded each year.

Although the number of bachelors degrees awarded in the Social Sciences at the State University and Colleges declined nearly 39% between 1971-72 and 1975-76, Social Sciences remained one of the three disciplines granting the greatest number of degrees in 1975-76. In 1975-76 the three leading bachelors degrees were awarded in Business and Management, Social Sciences, and Education.

At the University, the number of bachelors degrees awarded in the Social Sciences also declined between 1971-72 and 1975-76, yet remained number one in total degrees granted. Bachelors degrees in the Biological Sciences, which had held the number three position in 1971-72, moved to number two in 1975-76, while Interdisciplinary Studies, which reported only 268 bachelors degrees in 1971-72, increased to 1,945 degrees in 1975-76, and to the number three position in degrees awarded.

Education produced the greatest number of masters degrees at the State University and Colleges throughout the period 1971-72 to 1975-76. Engineering remained the leading masters degree discipline at the University of California throughout the same five year period. At the doctoral level, Biological Sciences led in degrees conferred in 1975-76. Law retained its position as the professional discipline producing the greatest number of degrees.

At the bachelors level in 1975-76 men at the California State University and Colleges selected Business and Management as their principal degree field, while women selected the Social Sciences. At the University of California, both men and women selected Social Sciences as the most popular bachelors degree.

More masters degrees were awarded to both men and women in Education at the State University and Colleges in 1975-76 than in any other field. University of California men chose Engineering as their principal field at the masters level, while women selected the Health Professions in 1975-76.

In 1975-76, more University men received their doctorates in Biological Sciences than in any other field. Biological Sciences and Social Sciences were selected as the number one choice by women for their doctorates. In the professions, more law degrees were awarded to both men and women than in any other discipline. The number of women receiving law degrees in 1975-76 tripled over the five year period reported.

CAVEATS – PLEASE NOTE

(a) Degree and Certificate awards for the Community Colleges in 1975-76 were not available in time for publication.

(b) Fractional degree awards reported for the University of California indicate dual or double majors.

(c) Student ethnicity data reflects voluntary self designations made by students. Many students elected not to report their ethnic category in 1975-76. For this reason ethnic data related to degrees are noncomparable between and within segments, degree types, and degree disciplines.

F A C U L T Y

FACULTY

INTRODUCTION

Faculty data appearing in this section were obtained from the National Center for Education Statistics' annual Higher Education General Information Survey (HEGIS), and the California Postsecondary Education Commission's annual report, "Faculty Salaries, Fringe Benefits, and Total Compensation at the University of California and the California State University and Colleges." All data and displays appearing in this section were verified by the systemwide offices of each segment prior to publication.

SIGNIFICANT TRENDS

The number of full-time faculty remained virtually constant in the California State University and Colleges from Fall 1972 to Fall 1976. The number of female full-time faculty increased over the same five year period from 2,134 to 2,353 (10.3%), while the number of male full-time faculty decreased from 9,135 to 8,892; a decrease of 2.6%. In 1976 women represented nearly 21% of the total faculty.

The percent of the faculty at the University of California holding the doctorate decreased from 87.9% to 85.2% during the period 1972-76. At the California State University and Colleges the percent of faculty possessing the doctorate increased from 63.3% to 71.2% during the same period.

The absence of data from the University of California and the California Community Colleges for the Fall term of 1976, at time of publication, precludes a more detailed description of trends that have taken place over the past five years.

CAVEATS – PLEASE NOTE

(a) The University of California and the California Community Colleges employ faculty on both nine-month and eleven-month contracts, while the California State University and Colleges uses nine-month contracts only.

(b) Tenure requirements among the segments differ. Caution should be exercised when performing intersegmental comparisons or analyses.

(c) Fall 1976 faculty salary, tenure, and male-female data were not available for the University of California and the California Community Colleges at time of publication.

(d) No statewide HEGIS survey was administered to gather faculty salary, tenure, and male-female composition for the Fall term of 1973.

(e) Data displayed in these tables are for full-time regular ranks faculty only.

FINANCE

INTRODUCTION

Information appearing in this section was obtained directly from selected editions of the annual *Governor's Budget*. All data and displays appearing in this section were verified by the systemwide offices of each segment prior to publication.

SIGNIFICANT TRENDS

Community College operating income and expenditures from 1973-74 to 1977-78 (proposed) will nearly double, increasing 92.5%. At the California State University and Colleges and at the University of California operating income and expenditures will increase 45.7% and 58.8% respectively over the same period.

CAVEATS – PLEASE NOTE

(a) Three years of actual, one year of estimated, and one year of proposed budgetary data appear for both operating (income and expenditure) and capital budgets for each segment.

(b) Income sources and expenditure programs significantly differ among segments. Only state appropriations are reflected in the Community College operating (income and expenditure) budget displays.

(c) Expenditures shown for California Community College capital outlay are for state supported projects under the Junior College Construction Act of 1967. These expenditures do not include monies spent for capital outlay from local funds outside the Construction Act, projects which were funded with federal money, or other state funding, such as Physically Handicapped Funds. Expenditures other than those shown on the charts would be approximately $50 million per year. The State Construction Program is derived from Community College Bond Funds.

CALIFORNIA'S INDEPENDENT COLLEGES AND UNIVERSITIES

CALIFORNIA'S INDEPENDENT COLLEGES AND UNIVERSITIES

In addition to the public system, there are approximately 265 independent colleges and universities serving more than 185,000 students.

The most outstanding feature of California's independent colleges and universities is the diversity of programs, character, and academic emphasis available to the student. Program offerings range from schools with a single program or related clusters of programs, to those with a full array of bachelors, masters, and doctorate degree programs as well as extensive professional and research activities. Enrollments range from a law school with five students to a full university enrolling over twenty-five thousand students in Fall, 1976. Independent degree-granting institutions fall into at least one of the following three categories, as defined in the California Education Code, Section 29023:

> *A-1 Institutions:* Institutions authorized to grant degrees by virtue of their being accredited by an accrediting agency or organization recognized by the U.S. Office of Education.
>
> *A-2 Institutions:* Institutions authorized by a formal approval process conducted by the State Department of Education's Bureau of School Approvals.
>
> *A-3 Institutions:* Institutions authorized on the basis of their ownership of $50,000 in real and personal property devoted exclusively to educational purposes, and through submission of a "full disclosure" statement to the State Department of Education's Bureau of School Approvals.

ENROLLMENT

ENROLLMENTS

INTRODUCTION

All information contained in this section was compiled from the National Center for Education Statistics, Higher Education General Information Survey (HEGIS): Opening Fall 1975 Enrollment.

SIGNIFICANT NOTES

Total enrollment in California's independent colleges and universities in 1975-76 is estimated to be 185,058. This includes an estimated 8,509 students enrolled in the 49 A-2 and A-3 schools which did not submit their Higher Education General Information Survey (HEGIS): Opening Fall Enrollment report for 1975.

Institutions in the A-1 group enrolled 85% of the students enrolled in independent institutions, while the A-2 and A-3 schools accounted for approximately 5 and 10 percent of the total enrollment respectively. Enrollment by sex was relatively evenly distributed in the A-3 institutions, with 43% female and 57% male. A-1 institutions enrolled 23% female and 77% male. Enrollment by ethnicity will be available for Fall 1976; however, the data were not available at time of publication.

CAVEATS – PLEASE NOTE

(a) 99 A-1 institutions (99%) reported in Fall, 1975.

(b) 21 A-2 institutions (87%) reported in Fall, 1975; 3 institutions (13%) estimated Fall 1975 enrollment using the previous year's enrollment.

(c) 60 A-3 institutions (54%) reported in Fall, 1975; 46 institutions (41%) estimated Fall 1975 enrollment using the previous year's enrollment.

D E G R E E S

DEGREES

INTRODUCTION

Degree data for this section were obtained entirely from the Higher Education General Information Survey (HEGIS) of the National Center for Education Statistics.

SIGNIFICANT NOTES

Because of the variance in the number of institutions reporting each year, no valid trend analysis and/or inter-institutional comparisons can be made. In 1975-76, there were 1,230 associates, 18,085 bachelors, 14,505 masters, 5,680 first professional, and 1,754 doctorate degrees awarded. At all degree levels, men outnumbered women in the number of degrees awarded with ratios remaining fairly constant.

The three most popular bachelors degrees awarded in 1971-72 (with 88 institutions reporting) for all students were in the Social Sciences, Fine and Applied Arts, and Letters disciplines. In 1975-76 (with 151 institutions reporting) Social Sciences, Business and Management and Fine and Applied Arts were the most popular degree fields at the baccalaureate level. At the masters level, in 1971-72 Business and Management, Education, and Engineering were the leaders for all students; in 1975-76 the leaders had changed to Education, Business and Management, and Public Affairs and Services.

At the Doctoral level, in 1971-72 Education, Engineering, and Social Sciences topped the list, while in 1975-76, Education, Psychology, and Social Sciences predominated.

Professional degrees in both 1971-72 and 1975-76 showed law degrees substantially outnumbering all other degrees awarded. In 1975-76 A-1 institutions accounted for 95% of all bachelors, 97% of all masters, 86% of all doctorates, and 77% of all first professional degrees reported.

CAVEATS – PLEASE NOTE

(a) The number of institutions reporting from year to year differs, making trend analysis inappropriate.

(b) In 1975-76, the Higher Education General Information Survey (HEGIS) added Pharmacy and Chiropractic Medicine to its discipline list at the first professional level.

INDEX

A-1 Institutions, degrees, 140-141; enrollment, 127
A-2 Institutions, degrees, 140-141; enrollment, 127
A-3 Institutions, degrees, 140-141; enrollment, 127
age, 38 (CCC), 39-41 (CSUC), 42-44 (UC)
associate degrees, 51 (CCC), 133 (Indep.)
bachelors degrees, 52, 56, 60 (CSUC); 53, 58, 63 (UC); 134, 138, 140 (Indep.)
California Community Colleges, age, 38; associate degrees, 51; capital outlay, 109-111; certificates, 51; ethnic enrollment, 19; expenditures, 93-98; full-time enrollment, 13; income, 97-98; mean salaries of faculty, 71, 74-75; part-time enrollment, 13; percent of total segmental enrollment, 12; sex, 16; student status, 35; tenure of faculty, 71, 74-75; undergraduate (lower division) enrollment, 13, 16, 35, 38; ungraded enrollment, 11
California's Public Colleges and University, 5
California State University and Colleges, age, 39-41; bachelors degrees, 52, 56, 60; capital outlay, 112-114; enrollments by discipline, 24-25, 31-32; enrollments by ethnicity, 20-21, 24-25; enrollments in extension, 11; expenditures, 99-103; faculty with doctorates, 87; faculty mean salaries, 72, 76-80; faculty with tenure, 76-80; full-time enrollment, 14; full-time equivalent enrollment, 45; graduate enrollment, 14, 17, 21, 25, 29, 31-32, 41, 45; income, 99-103, masters degrees, 52, 56, 61; part-time enrollment, 14; percent of total segmental enrollment, 12; sex, enrollment, 17, 20-21; sex, degrees, 52, 56-57; sex, faculty, 76-80; student status, 36; undergraduate enrollment, 14, 17, 20, 24, 29, 31-32, 36, 39-40, 45
capital outlay, 109-111 (CCC), 112-114 (CSUC), 115-117 (UC)
certificates, 51 (CCC)
DEGREES, associates, 51 (CCC), 133 (Indep.); bachelors, 52, 56, 60 (CSUC); 53, 58, 63 (UC); 134, 138, 140 (Indep.); by discipline, 56-57, 60-62 (CSUC), 58-59, 63-66 (UC), 138-141 (Indep.); doctorates, 55, 57, 59, 62, 66 (UC), 137, 139, 141 (Indep.); by ethnicity, 60-62 (CSUC), 63-66 (UC); masters, 52, 56, 61 (CSUC); 53, 58, 64 (UC), 135, 138, 140 (Indep.); professional, 54, 59, 65 (UC), 136, 139, 141 (Indep.)
ENROLLMENT, age, 38 (CCC), 39-41 (CSUC), 42-44 (UC); discipline, 24-25, 31-32 (CSUC), 26-27, 33-34 (UC); ethnicity, 19 (CCC), 20-21, 24-25 (CSUC), 22-23, 26-27 (UC); extension and ungraded classes, 11 (CCC, CSUC, UC); full-time, 13 (CCC), 14 (CSUC), 15 (UC), 127 (Indep.); full-time equivalent, 45 (CSUC, UC); graduate enrollment, 14, 17, 21, 25, 29, 31-32, 41, 45 (CSUC), 15, 18, 23, 27, 30, 33-34, 44, 45 (UC), 127 (Indep.); part-time, 14 (CSUC), 15 (UC), 127 (Indep.); percent of total segmental, 12 (CCC, CSUC, UC); sex, 16 (CCC), 17, 20-21 (CSUC), 18, 22-23 (UC); student status, 35 (CCC), 36 (CSUC), 37 (UC); undergraduate, 13, 16, 35, 38 (CCC); 14, 17, 20, 24, 29, 31-32, 36, 39-40, 45 (CSUC), 15, 18, 22, 26, 30, 33-34, 37, 42-43, 45 (UC), 127 (Indep.)
ethnicity, degrees, 60-62 (CSUC), 63-66 (UC); enrollment, 19 (CCC), 20-21, 24-25 (CSUC), 22-23, 26-27 (UC)
expenditures, 93-98 (CCC), 99-103 (CSUC), 104-108 (UC)
extension, 11 (CSUC, UC)
FACULTY, mean salaries, sex, and tenure status, 71, 74-75 (CCC); 72, 76-80 (CSUC); 81-86 (UC); with doctorates, 87 (CSUC, UC)
FINANCE, capital outlay, 109-111 (CCC), 112-114 (CSUC), 115-117 (UC); expenditures, 93-98 (CCC), 99-103 (CSUC), 104-108 (UC); income, 93-98 (CCC), 99-103 (CSUC), 104-108 (UC)
full-time, faculty 71, 74-75 (CCC), 72, 76-80, 87 (CSUC), 73, 80-87 (UC); students, 13 (CCC), 14 (CSUC), 15 (UC)
full-time equivalent students, 45 (CSUC, UC)
graduate enrollment, 14, 17, 21, 25, 29, 31-32, 41-45 (CSUC); 15, 18, 23, 27, 30, 33-34, 44, 45 (UC), 127 (Indep.)

income, 93-98 (CCC), 99-103 (CSUC), 104-108 (UC)
Independent Institutions, degrees, 133-141; enrollment, 127
intermediate degrees and candidates in philosophy, 54 (UC)
masters degrees, 52, 56, 61 (CSUC), 53, 58, 64 (UC), 135, 138, 140 (Indep.)
mean salaries of faculty, 71, 74-75 (CCC), 72, 76-80 (CSUC), 73, 81-86 (UC)
part-time, students, 13 (CCC), 14 (CSUC), 15 (UC), 127 (Indep.)
professional degrees, 54, 59, 65 (UC); 136 (Indep.)
student level, 28 (CCC), 29 (CSUC), 30 (UC)
student sex, enrollment, 16 (CCC), 17, 20-21 (CSUC), 18, 22-23 (UC); degrees, 51 (CCC), 52, 56-57 (CSUC), 53-55, 58-59 (UC)
student status, 35 (CCC), 36 (CSUC), 37 (UC)
undergraduate enrollment, 13, 16, 35, 38 (CCC), 14, 17, 20, 24, 29, 31-32, 36, 39-40, 45 (CSUC), 15, 18, 22, 26, 30, 33-34, 37, 42-43, 45 (UC)
ungraded classes, enrollment, 11 (CCC)
University of California, age, 42-44; bachelors degrees, 53, 58, 63; capital outlay, 115-117; enrollment by discipline, 26-27, 33-34; enrollments by ethnicity, 22-23, 26-27; enrollment in extension, 11; expenditures, 104-108; faculty with doctorates, 45; faculty mean salaries, 81-86; faculty with tenure, 81-86; full-time enrollment, 15; full-time equivalent enrollment, 45; graduate enrollment, 15, 18, 23, 27, 30, 33-34, 44, 45; income, 104-108; masters degrees, 53, 58, 64; part-time enrollment, 15; percent of total segmental enrollment, 12; sex, enrollment, 18; sex, degrees, 53-55, 58-59; sex, faculty, 81-86; student status, 37; undergraduate enrollment, 15, 18, 22, 26, 30, 33-34, 37, 42-43, 45
